Petri Suomala is Professor of Industrial Management, with emphasis on profitability management and management accounting in Tampere University of Technology-TUT (Finland), Department of Industrial Management, where he is Dean at the Faculty of Business and Built Environment. His research interests focus on profitability management and management accounting within various corporate functions and activities (R&D, production, marketing). He has extensively published in international peer-review journals on these topics, with specific attention towards interventionist approaches.

**Participation is free.**

**Workshop Organizer:**

Stefania Servalli (University of Bergamo)
